THE PIONEER AMERICAN SEEDSMAN
Established in 1870

Greetings to the American Farmers and Gardeners for 1953

Dear Customers and Friends:

Shumway's first Seed Catalog, published in 1870, was a 16-page book—size 6 x 9, total edition, 4,000 copies. Today this beautiful Catalog has 88 pages—size 10 x 13½—many items featured in natural colors—Garden, Flower and Field Seeds, Bulbs, Roses, Gardenias, Carnations, Small Fruits, House Plants, Hardy Shrubs, Perennial Plants, Hardy Lilies, Glads, Evergreens; in fact "Everything for the Garden." Edition a million copies. We refer you to Page 2 for our Complete Index.

As we go to press with this, our 83rd annual Catalog, we find the world in a period of readjustment following the second great World War. There is still a great deal of unrest. As relief from the strain and sadness of war, many people have turned to gardening, which is encouraging as it points the way to a better and happier form of life.

Plant A Garden

A modest Garden will afford you fresh Vegetables and Fruit all summer long with sufficient quantity to can and store for winter consumption. This is one very definite way to reduce your living expenses, and at the same time enjoy the world's Finest Fruits and Vegetables fresh from your own Garden.

May we suggest that you and your good wife and family carefully look through the Catalog at your earliest convenience; one writing on the order sheet enclosed the things you need; the other member of your family checking the items in the Catalog so you will have a copy of your order to check against your list when shipment is received. If you should find a shortage or mistake in any of your purchases, feel free to write us promptly.

We are all indeed grateful to Almighty God for his many blessings during those trying years referred to above, and likewise appreciative to you for your valued patronage of many years' standing.

If you should receive more than one copy of our catalog, would you please give one to a friend interested in gardening. Thank you.

Yours most sincerely,

Asparagus Roots

1901 Mary Washington

The Most Reliable Rust-Proof Asparagus
All 2-Year-Old Roots

This variety of Asparagus is so superior to all other varieties that it has completely replaced them, both in the home garden and for market. Plant 15 roots for each member of family. The plants form large clean shoots which are thick and heavy. They are long and straight, with closely folded tips. The color is a rich dark green with still deeper green tips. It is a heavy yielder and a long-lived producer of exceptionally fine quality. Complete Cultural Leaflet furnished. 25 Roots for \$1.25; 50 for \$2.15; 100 for \$3.75; 500 for \$14.00; 1000 for \$24.50, prepaid. For larger quantities see page 6.

Asparagus Seed

158 Mary Washington. 1 oz. of seed will plant a row 50 feet long. This is one of the earliest and most delicious of spring vegetables. Pkt., 15 cts.; oz., 35 cts.; ¼ lb., 95 cts.; ½ lb., \$1.50; lb., \$2.50, postpaid.

Mary Washington

266 Broccoli—Italian Green Sprouting

It forms a rather loose head made up of flower buds. The plants branch freely and each branch terminates in a head or bud cluster. The center heads are cut first and as the side shoots develop they are cut with about 6 inches of stem and bunched for market. Frequently 5 and 6 cuttings are made from one plant. Large heads of bright green, tender sprouts, which are cooked like Spinach or Brussels Sprouts and have a most delectable flavor, even milder and more palatable than that of Cauliflower. Sow the seed in May and harvest in August. I have a very remarkable strain of this vegetable which has become a great favorite. Pkt., 20 cts.; ½ oz., 45 cts.; oz., 75 cts.; ¼ lb., \$1.50; ½ lb., \$2.50; lb., \$4.50, postpaid.

Cook and Serve Like Cauliflower

338 Chicory

Witloof or French Endive. This splendid vegetable gives every gardener a chance to grow his own winter salad, since the roots can easily be forced in the cellar during the winter. To grow the roots, sow the seed in the open not later than June 1 and lift them in the fall. For forcing, dig them and pack closely together in boxes and cover with 6 in. of sand, light earth, peat moss or sawdust. When the sprouts break through the surface, they are ready for the table. Pkt., 15 cts.; oz., 60 cts.; ¼ lb., \$2.00, postpaid.

410 Dandelion

Improved Thick-Leaved

Increasing sales with every year are a sure indication that this delicious vegetable—a relative to our common Dandelion—is becoming more and more popular with gardeners everywhere. Rich soil is needed where a heavy crop is wanted. The leaves are offered in the market either green for boiling or blanched to be eaten like Endive. Pkt., 25 cts.; oz., 75 cts.; ¼ lb., \$2.50, postpaid.

155 Artichoke Large Green Globe

A delicious vegetable which is cultivated for its large flowerheads, which are cooked like Asparagus. It is considered a delicacy and demands a high price in all better city markets. The plant is a perennial and when set in good soil and given slight winter protection of leaves or straw, will remain in bearing several years, but for best results it should be renewed every two or three years. Pkt., 30 cts.; ½ oz., 75 cts.; oz., \$1.25, postpaid.

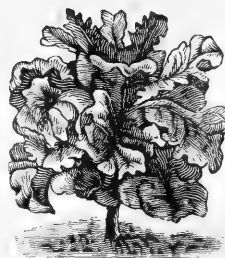

341 Corn Salad or Feticus

Large Leaved Round

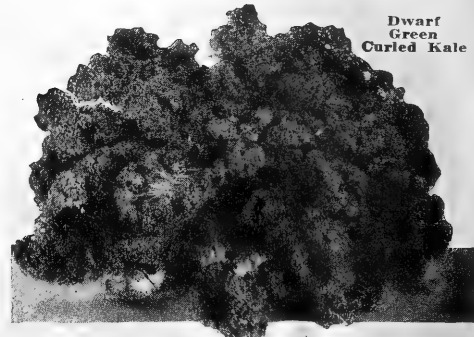

An excellent and valuable vegetable for salads; can be had continuously by successive sowings. Late sowings may be covered with straw in winter for early use in the spring. In some sections of the country it is used in place of lettuce for winter use. Pkt., 25 cts. (Very Scarce).

340 Collards Georgia or Southern Creole Boiling "Greens"

Georgia Collards

A tall cabbage-like, loose-leaved plant which stands cold weather or adverse conditions very well and will grow on land which is too poor for a crop of cabbage. Most Southern gardeners will not be without it. Often called "Cabbage Bunch." Grows 2 to 3 feet high and forms large, loose, open heads. The quality is improved by frost, if not too severe. Pkt., 10 cts.; oz., 25 cts.; ¼ lb., 60 cts.; ½ lb., 95 cts.; lb., \$1.50, postpaid.

Dwarf Green Curled Kale

Borecole or Kale— Used for "Greens"

Sow the seed from early spring until the middle of August. The early sowings give fully grown plants, whereas the later sowings will furnish excellent small tender leaves. One ounce sows 500 feet of drill.

462 Dwarf Green Curled. The plants of this variety are hardy when the temperature does not go below zero. A heavy frost or freezing improves this delightful green. Leaves are large, curled and fringed, bright green in color. The plants are of even dwarf growth. Pkt., 15 cts.; oz., 40 cts.; ¼ lb., 95 cts.; ½ lb., \$1.60; lb., \$3.00, postpaid.

463 Siberian or Sprouts Curled. This variety is very similar to the Dwarf Scotch except that it is not as curled. It makes excellent greens at almost any season of the year. Pkt., 10 cts.; oz., 30 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.25, postpaid.

464 Tall Green Curled Scotch. Very much like the Dwarf Curled Scotch except that it has a spreading habit and the stalk holds the leaves well up off of the ground. Pkt., 15 cts.; oz., 40 cts.; ¼ lb., 95 cts.; ½ lb., \$1.60; lb., \$3.00, postpaid.

260 MANGEL, SHUMWAY'S COLOSSAL GIANT

The Largest Yielding Variety I Have Ever Seen

With the extremely high prices of grain, all farmers should grow a liberal acreage of my wonderful Colossal Mangel. Mangels and Sugar Beets will grow and produce a crop on any fair Corn land. Root crops for cattle feeding are equal to grain pound for pound and are produced at half the cost. The value of Mangels for stock feeding is very important. For milk cows they increase the flow of milk and are relished by all animals. The roots are of enormous size, very uniform in shape, smooth and clean. Skin is bright, rich red; flesh is white, tinted with rose. Easily harvested as roots grow one-half to two-thirds out of the ground and frequently 2 feet or more in length. Yield 35 to 50 tons per acre. Oz., 15 cts.; 1/4 lb., 50 cts.; 1/2 lb., 90 cts.; lb., \$1.65; 5 lbs., \$6.75, P.P.

313 BLUE RIBBON STOCK CARROT

Wonderful Yielder—25 tons per acre not uncommon. The value of a root crop such as Carrots is appreciated and used extensively by large stock raisers. Field Carrots are of high nutritive value; also a great tonic, keeping the stock in good condition. Horses are especially fond of them and in a good many stables, horses are fed carrots once a day. The wise dairyman knows the value of carrots for cows, as they will not only increase the flow of milk and improve the quality, but will give a rich, golden color to the butter. Sow seed thinly in drills 3 feet apart using two pounds to the acre. Color creamy white color, with a greenish top or crown. The roots are smooth, 8 to 10 inches in length, about 3 inches broad at the shoulder, and gradually tapering to the bottom. The flesh is crisp, solid, sweet, white and very nutritious. Greatest of all dairy feed. Pkt., 15 cts.; oz., 45 cts.; 1/4 lb., 90 cts.; 1/2 lb., \$1.50; lb., \$2.75; 2 lbs., \$5.00; 5 lbs., \$11.75, postpaid.

313 Blue Ribbon Stock Carrot

257 Mangel, Golden Tankard

A smooth, yellow-fleshed Mangel, high in saccharine content and in milk producing qualities. Yields immense crops and is easily harvested. Roots are heavy and solid, of a thick and typical tankard shape, tapering quickly at the bottom which is quite broad, with only a small tap-root. The flesh is firm, rich deep yellow color. It is an excellent keeper. Oz., 15 cts.; 1/4 lb., 45 cts.; 1/2 lb., 80 cts.; lb., \$1.50; 5 lbs., \$6.00, postpaid.

255 Mangel, Mammoth Long Red

A very prolific strain and an abundant yielder. Frequently reaches a length of about two feet, growing about one-half above the surface. The tonnage per acre on rich or well-fertilized ground is something immense. Skin is deep red and flesh is veined with rose-pink. Ranks very high in nutritive value and is greatly relished by stock. Oz., 15 cts.; 1/4 lb., 45 cts.; 1/2 lb., 80 cts.; lb., \$1.50; 5 lbs., \$6.00, postpaid.

263 Sugar Beet—Improved White Sugar

One of the best for stock feeding purposes. Of easy and cheap production, with rich sugary quality. The crop has reached 30 tons per acre, and single specimens have weighed 30 pounds and over. Oz., 15 cts.; 1/4 lb., 45 cts.; 1/2 lb., 80 cts.; lb., \$1.50; 5 lbs., \$6.00, postpaid.

306 Carrot, Long Orange

Equally good for stock and table use. My stock of this extra long carrot is the strongest and purest strain of that well known carrot on the market. The roots are of large size, smooth, fine grained and in all respects superior. This beautiful carrot is always well formed. The color is deep orange, as indicated by the name. Enormous crops can be grown under good culture. A wonderful table variety and equal to any for stock feeding, but do not grow as large as Shumway's Blue Ribbon stock. Pkt., 12 cts.; oz., 35 cts.; 1/4 lb., 80 cts.; 1/2 lb., \$1.35; lb., \$2.50; 2 lbs., \$4.75, postpaid.

Mango Melon

496 Mango Melon or Vegetable Peach. Cultivated the same as muskmelon, but used only for mangoes, preserving, pies or pickling. The fruit has the size, shape and golden yellow color of an orange. The flesh is snow white, and makes excellent preserves and pickles. Very productive. Pkt., 25 cts.; oz., 75 cts., postpaid.

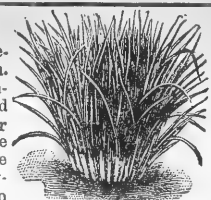

258 Giant Half Sugar Rose Top

A Cross Between Mangels and Sugar Beet—A Great Yielder

This magnificent Sugar Beet, while giving nearly as large a yield of easily grown and harvested roots as a crop of Mangels, supplies a food of much higher nutritive value, the roots for feeding purposes being really more valuable, pound for pound, than those of the very best strains of Sugar Beet, and the yield under equally favorable conditions being more than double. Roots are of oval shape, green above the ground and white below; flesh white and sweet. Oz., 15 cts.; 1/4 lb., 45 cts.; 1/2 lb., 80 cts.; lb., \$1.50; 5 lbs., \$6.00, postpaid.

My Danish Ball Head cabbage produces its crop in about 110 days. It is sure to head; the heads are large, flattened globe shape, 8 to 9 inches across by 6 to 7 inches deep. It is popular in the market of all the large cities. My seed of this popular cabbage comes to me direct from the best growers in America. Produces wonderful tonnage per acre. Its extreme earliness, about 7 days earlier than Early Snowball, and uniformity of heading will excel the others for early marketing. Before the foliage is full grown and the heads have begun to appear the inside leaves begin to curl and twist forming a protection. The outside foliage is strong and vigorous. This strain heads up evenly throughout the field, which no other Cauliflower is known to do. The heads are decidedly larger, deeper and more solid than the other varieties. Pkt., 35 cts.; ¼ oz., \$1.00; ½ oz., \$1.75; oz., \$3.00; ¼ lb., \$9.00; ½ lb., \$16.00; lb., \$30.00, postpaid.

Though it is essentially an early variety it will store quite well until about Christmas or New Year's Day. They are extremely solid, free from strings, and have a remarkably rich nutty flavor. Pkt., 20 cts.; oz., 90 cts.; 1/4 lb., \$2.50; 1/2 lb., \$4.50; 1 lb., \$8.50, postpaid.

Florida Golden

332 Florida Golden. A magnificent new early variety. Enjoys characteristics of the Golden Plume or Wonderful but is of greater height and weight, grows 18 to 20 in. tall and the edible portion of the stem is larger. Hearts blanch a rich cream-color of exceptionally fine quality. The stems are brittle, crisp and free of strings. Carefully bred for high quality and shows less tendency to produce premature seed-stalks than other strains. Be sure to try this grand variety this year. You will be delighted with your results. Pkt., 15 cts.; oz., 60 cts.; 1/4 lb., \$2.00; 1/2 lb., \$3.85; 1 lb., \$7.50, postpaid.

Celeriac—Plant Some

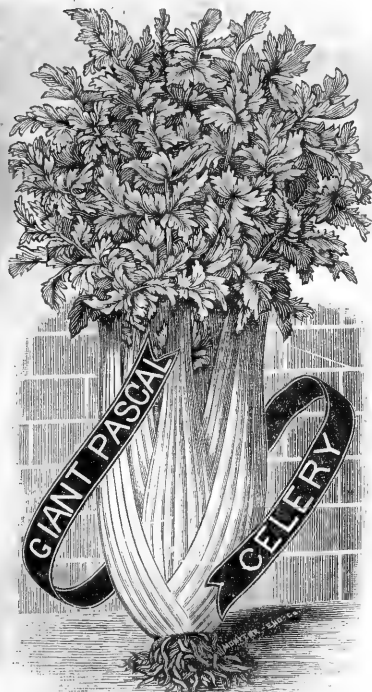

331 Celeriac, Turnip Rooted Celery, Large Smooth Prague. A root vegetable obtained from celery by selective breeding. The root, which is the edible part, is turnip-shaped. Large Smooth Prague is the best improved strain with large well formed roots; smooth and with few rootlets. Imparts an excellent celery flavor to stew or soup. Delicious when boiled and sliced cold for salad. Keeps well for winter, especially if packed in damp sand or placed in pits like turnips or carrots. Pkt., 15 cts.; oz., 60 cts.; 1/4 lb., \$2.00; 1/2 lb., \$3.85; 1 lb., \$7.50, postpaid.

Stalks are tall and thick, solid, stringless, and of a rich, nutty flavor; broad, distinctly ribbed, tender, crisp, and very tasty. After blanching they are an attractive light yellow. Inasmuch as the stalks are green, soil should be used for blanching. If properly stored, it will keep in perfect condition throughout the winter months. SWEET CORN—Shumway's Superior Money Making Early Varieties

All My Sweet Corn Packets Contain Two Ounces

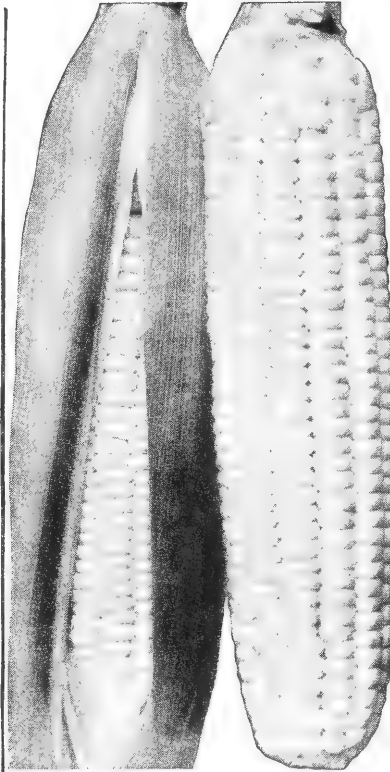

Plant Every Week After Frost for Continuous Crop.

351 Improved Golden Bantam

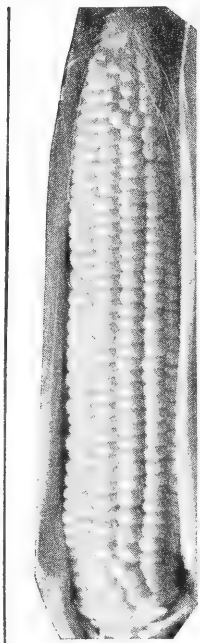

Extra Select Pure Bred Seed

Very popular early Sweet Corn. The standard of the yellow varieties. The ears are very uniform, 6 to 7 inches long with 8 rows. The kernels are broad and evenly set, rich golden yellow in color; tender, sweet and palatable. Somewhat dwarf in habit, the plants measure only about 4½ to 5 feet in height, usually yield two ears to the stalk. A sure cropper, very productive and equally valuable for home or market garden. Ready for use in 75 days. Pkt., 15 cts.; ½ lb., 35 cts.; lb., 60 cts.; 2 lbs., \$1.10; 5 lbs., \$2.35, postpaid.

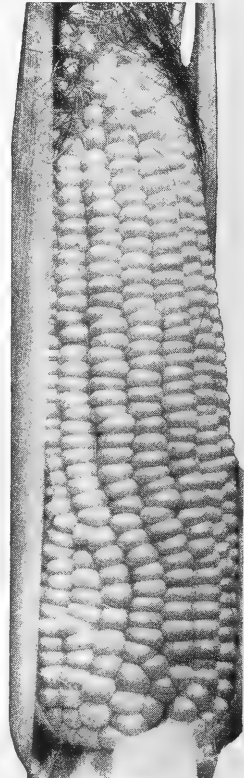

359 Howling Mob

Ready for table in 85 days. The finest early midseason Sweet Corn ever introduced. It is vigorous and productive, with ears 7 to 9 in. long, closely set with 12 or 14 rows of beautiful pearly white grains. The kernels are arranged neatly in straight rows which give them a particularly attractive appearance and make it easy to eat from the cob. The kernels are deep and contain a large quantity of delicious sweet pulp beneath the thin tender skin. Pkt., 15 cts.; ½ lb., 35 cts.; lb., 60 cts.; 2 lbs., \$1.10; 5 lbs., \$2.35, postpaid.

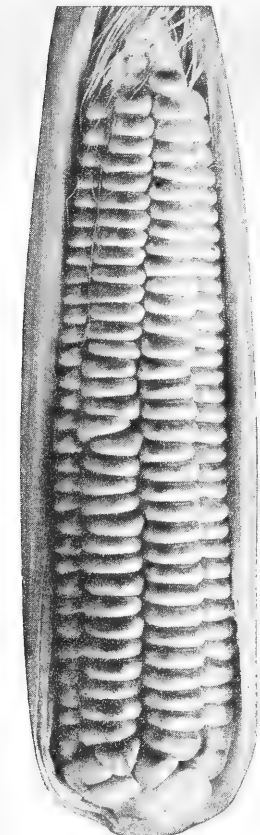

358 Shumway's Extra Early Market Gardeners

An outstanding, luscious, early strain of sweet corn. An exceptional variety for market gardeners as the name implies. The kernels are silvery-white and extremely sweet. It remains in table quality for a considerable period, which makes it particularly profitable. In this variety I consider we have one of the best varieties of sweet corn offered. Ready for table in 65 days. Pkt., 15 cts.; ½ lb., 35 cts.; lb., 60 cts.; 2 lbs., \$1.10; 5 lbs., \$2.35, postpaid.

363 Early Evergreen

A selected strain of Stowell's Evergreen bred for earliness. It will produce edible ears a week to ten days earlier than the Stowell's Evergreen. For this reason it is a valuable market sort providing a succession to the second early types. In other respects its qualities are practically identical with Stowell's; ears 7½ inches long; 12 to 14 rows; deep white luscious kernels, remaining in table condition a long time. Ready for table in 80 to 85 days. A favorite in northern, cooler localities. Pkt., 15 cts.; ½ lb., 35 cts.; lb., 60 cts.; 2 lbs., \$1.10; 5 lbs., \$2.35, postpaid.

370 New Golden Gem

370 New Golden Gem

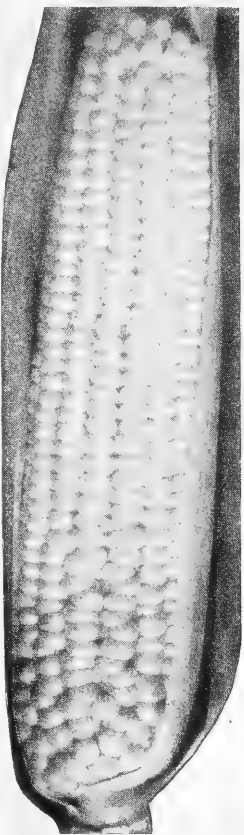

An entirely new variety developed by the North Dakota Experiment Station and the earliest yellow sweet corn on the market, producing ears in 67 days. The ear is about the same size as Sunshine, but has only 8 to 10 rows. Quality, tenderness and sweet flavor are unsurpassed. The plant is exceedingly short, but vigorous and productive and certain to be a great favorite. Pkt., 15 cts.; ½ lb., 35 cts.; lb., 60 cts.; 2 lbs., \$1.10; 5 lbs., \$2.35, postpaid.

367 Early Golden Market

One of the later introductions in early Sweet Corn maturing marketable crop in 70 days from time of planting. Ears 8 inches long, 10 to 12 rowed, fine grained, delicious flavor, stalks 4½ feet high. I consider this the leader by far of all early yellow varieties of Sweet Corn. A sure money maker for market gardeners where a matter of 5 to 10 days in marketing a crop makes a tremendous difference in the value per dozen or 100 ears. Pkt., 15 cts.; ½ lb., 35 cts.; lb., 60 cts.; 2 lbs., \$1.10; 5 lbs., \$2.35, postpaid.

353 Whipple's Early Yellow

A new medium early yellow variety valuable for its large ears and excellent quality. The ears are 8 to 10 inches long and have 14 to 16 rows of deep kernels, very tender and sweet. Ready for table in 70 days. A fine type for either the home or market garden. A good yielder. Pkt., 15 cts.; ½ lb., 35 cts.; lb., 60 cts.; 2 lbs., \$1.10; 5 lbs., \$2.35, postpaid.

369 Whipple's Early White

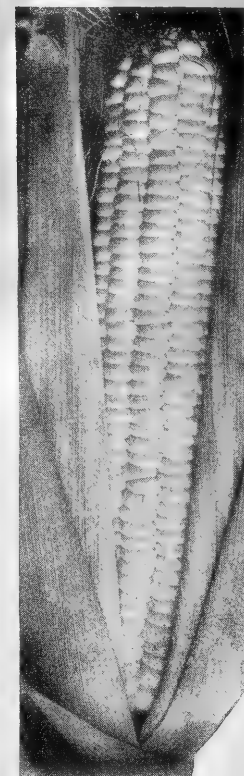

See Pages 6 & 7 for SPECIAL LOW PRICES to Market Gardeners

369 Whipple's Early White

A grand early white corn. The ears have 16-20 rows of deep rather narrow kernels and are of very fine quality. The ears are 8-9 inches long and large around. They look like well bred Evergreen yet they mature two to three weeks earlier. Market gardeners find that the size, high yield (there are often two good ears on a stalk) and earliness make this a very profitable kind to grow for markets where a white corn is wanted. Ready for use in 80 days. Pkt., 15 cts.; ½ lb., 35 cts.; lb., 60 cts.; 2 lbs., \$1.10; 5 lbs., \$2.35, postpaid.

350 Golden Sunshine

Ready in 68 days. A quite new, remarkably fine, extra early variety originated through selective breeding by Professor A. F. Yeager of the North Dakota Experiment Station. It is earlier than Golden Bantam and stays in table quality for a greater length of time. The ear is about one inch longer and has 10 to 12 rows instead of 8. The kernels are sweeter, more tender and a lighter yellow in color. The plant is taller and more vigorous. Because of its earlier maturity, longer season and superior quality, it brings better prices than the Bantam and is displacing the latter in many markets. Pkt., 15 cts.; ½ lb., 35 cts.; lb., 60 cts.; 2 lbs., \$1.10; 5 lbs., \$2.35, postpaid.

405-A and C

9 to 10 inches long. Pkt., 15 cts.; oz., 40 cts.; ¼ lb., 95 cts.; ½ lb., \$1.65; lb., \$3.00; 2 lbs., \$5.50, postpaid.

Pkt., 15 cts.; oz., 40 cts.; ¼ lb., 95 cts.; ½ lb., \$1.65; lb., \$3.00; 2 lbs., \$5.50, postpaid.

It is much grown in the South for early shipment to northern cities, and has recently become a very popular variety with the northern market gardeners. It has a fine dark green color and remains in table condition longer than any other white-spined variety. The flesh is white, solid, and crisp, with an unusually small seed cavity. A very productive yielder. Pkt., 12 cts.; oz., 30 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.25; 2 lbs., \$4.25, postpaid.

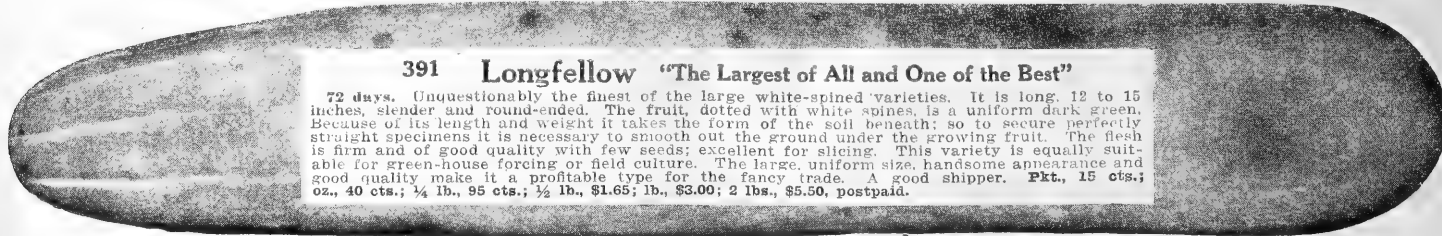

DAVIS PERFECT

395—55 days. "Sometimes known as Boston Pickling." Of good quality and fit for slicing, but because of its small size, 5 by 2½ inches, it is more popular for pickling. It produces early and yields a large and continuous crop if vines are kept plucked. The fruits are bright green, smooth, uniform and square-ended. Excellent for early pickles. Pkt., 12 cts.; oz., 30 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.25; 2 lbs., \$4.25, postpaid.

391 Longfellow "The Largest of All and One of the Best"

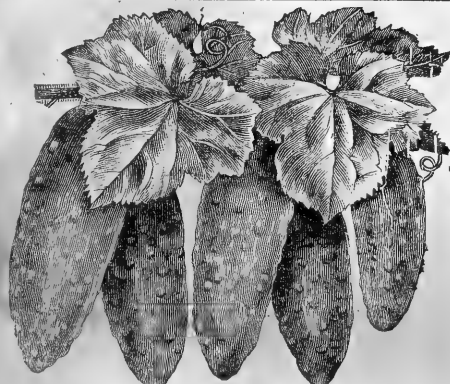

72 days. Unquestionably the finest of the large white-spined varieties. It is long, 12 to 15 inches, slender and round-ended. The fruit, dotted with white spines, is a uniform dark green. Because of its length and weight it takes the form of the soil beneath; so to secure perfectly straight specimens it is necessary to smooth out the ground under the growing fruit. The flesh is firm and of good quality with few seeds; excellent for slicing. This variety is equally suitable for green-house forcing or field culture. The large, uniform size, handsome appearance and good quality make it a profitable type for the fancy trade. A good shipper. Pkt., 15 cts.; oz., 40 cts.; ¼ lb., 95 cts.; ½ lb., \$1.65; lb., \$3.00; 2 lbs., \$5.50, postpaid.

628 Matures in 75 days. Smooth seeded. The best known of the edible pod varieties. The vines, 4 to 5 feet tall, produce a plentiful crop of large thick pods, about 4½ in. long, light green, with seeds creamy or white. The pods should be picked when the seeds are just beginning to form. At that time they are very tender and brittle and break like snap beans without stringiness. Broken and cooked, pod and seedlings together, this variety

makes a choice, appetizing dish. ½ lb., 35 cts.; 1 lb., 65 cts.; 2 lbs., \$1.20, postpaid.

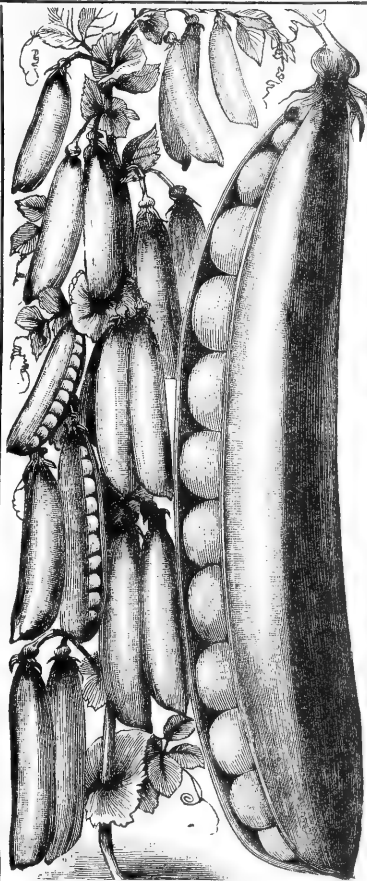

½ lb. of seed will plant 25 foot row.

631 Dwarf Telephone or Daisy

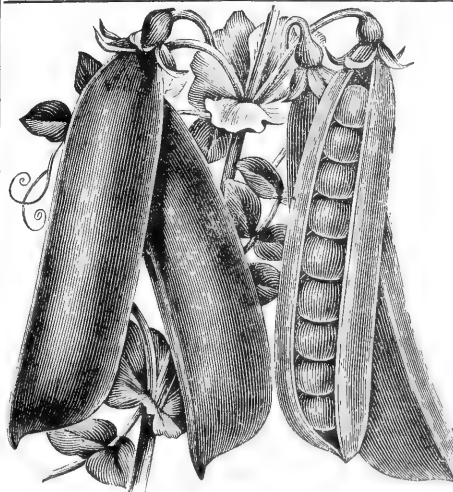

70 days. A selected strain embodying all the superb qualities of the Improved Large Telephone in a dwarf type. No other dwarf variety can boast such large pods. They are about 4½ inches long, plump, round-ended, and tightly filled with 8 or 9 large green peas of the finest quality. The vines are about 2 feet tall, vigorous robust growers, re-

quiring no support. An exceptional home garden variety and a great favorite with gardeners. ½ lb., 35 cts.; 1 lb., 65 cts.; 2 lbs., \$1.20, postpaid.

635 Tall Telephone or Alderman

68 days. A very prolific main crop type especially popular with the market gardener. It produces enormous dark green pods, larger than those of any other commercial variety. The pods contain 7 to 9 large oval green peas of the choicest quality. The pods and peas have a fine appearance which remains perfect for several days after picking. They bring a high price in the market. The vines grow vigorously to a height of 4½ to 5 feet. In the home garden are usually supported on strings or trellis. Pods, 4½ inches long, slightly tapered. ½ lb., 35 cts.; 1 lb., 65 cts.; 2 lbs., \$1.20, postpaid.

616 Two-Hundredfold Good Freezer

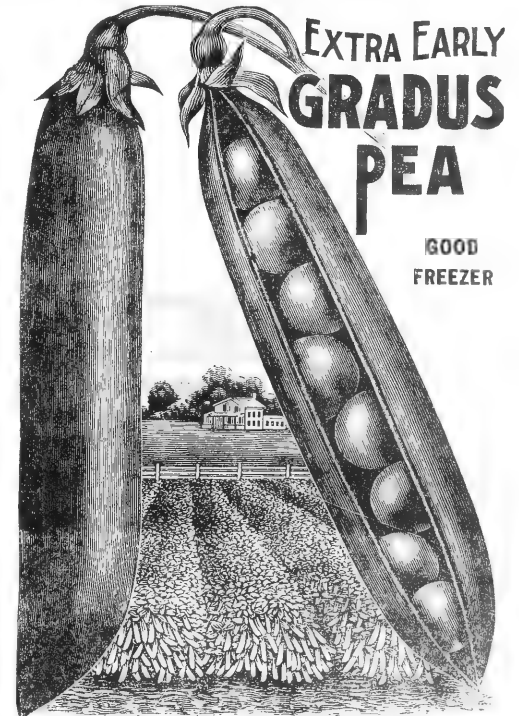

616

Two-Hundredfold

616 Matures in 65 days. This new variety is a distinct addition to the list of dwarf main crop peas. It belongs to the same general class as Dwarf Telephone but is far superior to that variety in that the pods are a fine dark green, and it is slightly earlier. Vines grow 2½ to 3 feet tall, bearing large fat pods 3½ to 4½ inches long, well filled, pointed, broad and straight. Both pods and peas are an attractive dark green. A wonderful variety to plant for late summer crop as it will stand the summer heat exceedingly well. Be sure to try this grand variety. ½ lb., 35 cts.; 1 lb., 65 cts.; 2 lbs., \$1.20, postpaid.

619 Gradus or Prosperity

60 days. A standard popular early variety of good quality. The vines are of medium height, about 3 feet, have heavy stems and large light green leaves. The dark green pods measure about 4 inches, are rounded near the point, and contain 7 to 10 large, tender peas, rich in flavor. The seeds remain tender and sweet long after picking. Their beautiful light green color is not lost in cooking. They are probably the largest highly flavored peas grown. My improved strain of this is considered one of the best and most reliable producers when planted on warm light rich soil. ½ lb., 35 cts.; 1 lb., 65 cts.; 2 lbs., \$1.20, postpaid.

The roots are nearly round, and of most appealing appearance; the rich, bright scarlet of the upper portion contrasting brilliantly with the whiteness of the tip. The flesh is more crisp and tender than that of any other radish; and very mild in flavor. It remains in choice table condition unusually long. Ideal to plant every 10 days for succession. May be sown late since it resists summer heat. Pkt., 12 cts.; oz., 30 cts.; ¼ lb., 60 cts.; ½ lb., 90 cts.; lb., \$1.50; 2 lbs., \$2.50; 5 lbs., \$5.50, postpaid.

This variety is bred to resist Fusarium Wilt. The large fruits are smooth, deep scarlet in color, setting 5 to 7 in a single cluster. The flesh is firm with few seeds, making an ideal variety for Tomato Juice or early market. The vines are open in growth; therefore the fruit ripens evenly. Giant Oxheart

Pride of Every Garden. Enormous Size. Delightful Flavor. Among large fruited tomatoes this variety is unique. In form it is distinct, since it is almost exactly the shape of a heart as the name implies, and single fruits sometimes weigh more than two pounds. This firm red flesh is non-acid, but instead of being flat-tasting it has a pleasing flavor. Matures in 87 days. Pkt., 25 cts.; ½ oz., 60 cts.; oz., \$1.00, postpaid.

TOMATO GROWERS!

TOMATOES . . . 1 to 3 WEEKS EARLIER!

BIGGER YIELDS!

LARGER - MEATIER - SEEDLESS TOMATOES!

Just Spray With **Blossom-set** NO-SEED HORMONE

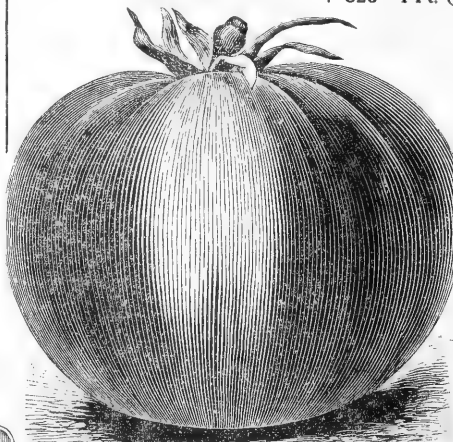

EASY TO USE! Not necessary to confine spray to blossoms only. Just direct spray at blossoms!

Early tomato blossoms often fail to set fruit and drop off the plants, especially when nights are cold and days are short and cloudy. Spraying the blossoms with No-Seed Hormone BLOSSOM-SET makes them set fruit; keeps them on the plants.

That means you'll get first tomatoes weeks earlier . . . tomatoes that otherwise would not have developed at all. These tomatoes are more uniformly shaped, bigger, meatier, and have better color and more delicious flavor. Many are seedless.

Use it also on CUCUMBERS, EGGPLANTS, PEPPERS, SQUASH. Makes them produce more and better.

798 BUCKBEE'S NEW TOMATO
ABRAHAM LINCOLN

World Beating
TOMATO

This famous Tomato was originated on Buckbee's Rockford Seed Farms and named in honor of Illinois' greatest son, Abraham Lincoln. This giant Tomato was first introduced by H. W. Buckbee in 1923 and is the largest Tomato we have ever grown. We have had as many as 9 Tomatoes in a single cluster with a total weight of 7 pounds; the average weight however is about a pound, but customers have reported producing single fruits weighing nearly 3 pounds. Color, beautiful dark red fruits, extra heavy, large, sweet, solid and meaty, with very few seeds, and for so large a Tomato it is remarkably smooth and free from cracks and seams.

The
Giant
of
All
Tomatoes

Abraham Lincoln Tomato, while unusually large, ripens all the way through the fruit, making it an ideal variety for Catsup, Chilli Sauce, Tomato Juice, and slicing. It is a very shy seeder; therefore the flesh is firm and meaty.

The plant is a sturdy, healthy grower with distinctive bronzy green foliage; it ripens the first fruit immediately following the ones of the first sort, and continues bearing from that time until the plant is killed by frost. This variety was originated on H. W. Buckbee's Seed Farm in Rockford, Illinois, and in the recent purchase of the "Buckbee" business we secured the original stock seed, and offer same to you as long as supply remains unsold, at the following special prices: Catalog No. 798—Pkt., 30 cts.; 4 pkts., \$1.00; ¼ oz., \$1.50; ½ oz., \$2.50; oz., \$4.00, postpaid.

Mrs. H. R. Cusil, Henderson, Ky.—Your Abraham Lincoln Tomatoes are superfine. Had clusters of 6 to 10 fruits that averaged over 1¼ lb. each.

Geo. Lintz, Alton, Ill.—I raised 5 Abraham Lincoln Tomatoes in one cluster that weighed 11½ lbs. Every one was as smooth as an apple.

Shumway's Superior Lawn Grass Seed for Homes and Golf Courses

5 lbs. used for 1000 sq. ft. or 50 x 20 ft.

1605 Shumway's Forest City Shady Place Lawn Seed

Getting an attractive lawn under trees or in between apartment buildings has been a problem with many home owners but this Forest City Shady Place Mixture will solve your difficulty. It is a combination of fine, dwarf growing, evergreen varieties, which in their wild or natural state are to be found growing in the woods or other sheltered and shaded spots. Ground that has been densely shaded by trees is frequently "sour," and if the drainage is defective it is apt to be covered with moss and coarse Grasses. In such cases an application of slaked lime, at the rate of one hundred pounds to each thousand square feet, or two tons to the acre, is an excellent corrective and sweetener, but the moss should be first raked off. Sow seed at the rate of 1 lb. for 200 sq. ft., 5 lbs. for 1,000 sq. ft. Postpaid, lb., \$1.25; 2½ lbs., \$3.00; 5 lbs., \$5.75; 10 lbs., \$10.50.

1601 Shumway's Rockford Park Refined Lawn Seed Mixture

This is by far the best mixture of grasses for a fine textured lawn. It is made up of the choicest and hardiest varieties that will winter well and thrive under varying climatic conditions. It has been re-cleaned, compounded and blended as perfectly as modern machinery can do it. All of our grasses are analyzed by the seed laboratories and the degree of purity shows the elimination of practically all chaff and foreign seeds.

If we could compound a better lawn mixture we would do so, but through tests we failed to find its superior. Postpaid, lb., \$1.25; 2½ lbs., \$3.00; 5 lbs., \$5.75; 10 lbs., \$10.50.

1597 Astoria or Colonial Bent Grass

1606 Orchard Grass

A valuable grass for pasture or hay land, and on account of its earliness especially valuable for a permanent pasture. It furnishes green grass very early in the spring and until late in the fall. When closely cropped it grows up very quickly and is ready for grazing again in ten to twelve days. It is succulent and nutritious, furnishing excellent pasture or hay. When grown for hay, two good crops can be obtained in one season. Sow 20 lbs. per acre. Postpaid, ½ lb., 45 cts.; lb., 75 cts.; 2½ lbs., \$1.75; 5 lbs., \$3.25. Especially prepared for quick results and a full crop. This mixture is composed of the following annual varieties: Peas, Soy Beans, Vetches, Crimson Clover, Rape, Sugar Cane, Millet, Turnips, Rutabagas, Barley, Rye and other grains and forage plants, all in the right proportion. This mixture will provide an abundant pasture within six weeks from day of sowing the seed, continuing and bountiful until destroyed by frost. Almost all of these varieties will come up again as fast as they are eaten down and will furnish 4 to 5 times as much forage as can be obtained from any clover-grass mixture. This food is succulent and nutritious and much relished by hogs. It will keep them healthy and strong, and they will gain in weight easily and quickly. This mixture will prove a most profitable investment for every farmer. It is usually sown about corn planting time, but can also be sown as a catch crop any time during the season until August. Sow 50 lbs. per acre. Postpaid, lb., 55 cts.; 2½ lbs., \$1.20; 5 lbs., \$3.25. For Larger Quantities See Wholesale Green List Enclosed.

This mixture contains proper proportions of the very finest "EX-CEL" Brands of Medium and Mammoth Red Clover, Sweet Clover, Alsike, Alfalfa, Kentucky Blue Grass, Red Top, Orchard Grass, Timothy, Rye Grass and Bromus. By proper blending, this combination of grasses has given perfect satisfaction under every and all conditions. It is adapted to dry or moist lands. Sow in spring 15 pounds per acre. Postpaid, ½ lb., 45 cts.; lb., 75 cts.; 2½ lbs., \$1.75; 5 lbs., \$3.25. For Larger Quantities See Wholesale Green List Enclosed.

1525 Bromus Inermis—Brome Grass

It is a long lived hardy northern grass that withstands drought better than other grasses. It makes good hay of about the same quality as Timothy, but it is much more valuable for pasture either alone or with Alfalfa.

Alfalfa and Brome Grass. Recent tests at Michigan State College have shown that a mixture of Brome Grass and Alfalfa makes ideal summer pasture during the mid-summer season when it is needed the most. On light sandy soil in northern Michigan this mixture produced over a ton of hay per acre from the first cutting and good pasture for the balance of the season.

For this purpose 10 lbs. of Alfalfa and 5 lbs. of Brome grass seed are sown per acre either in the spring or in August. When sown alone, Brome grass is seeded at the rate of 20 lbs. per acre. It may be seeded with Oats, Barley or Wheat. The mixture of Alfalfa and Brome Grass gives best results when a good top growth is permitted before pasturing. Cattle will eat the Brome Grass in preference to the Alfalfa, giving the latter a chance to become well established.

Postpaid, ½ lb., 45 cts.; lb., 75 cts.; 2½ lbs., \$1.75; 5 lbs., \$3.25.

1615 Timothy (45 lbs. Bu.)

Purity 99½%, Germination 90%

Sow in Spring or Fall 12 lbs. per acre. As a crop to cut for hay, Timothy is probably surpassed by no other grass now cultivated. It is usually sown with other grasses about one-half to one-third of the above amount. Timothy Seed is one of my specialties. Postpaid, lb., 60 cts.; 2½ lbs., \$1.35; 5 lbs., \$2.40. For Larger Quantities See Wholesale Green List Enclosed.

1618 Timothy and Alsike Mixture (45 lbs. Bu.)

Mixture Contains 20% Alsike; 80% Timothy
The Greatest of All Pasture and Hay Crops

By far the best and cheapest seeding. On low-bottom, moist soils where other grasses fail, this will give perfect satisfaction, and on upland it's amazing what wonderful crops you can raise.

By experimenting it was found that Alsike and Timothy made a combination that was excellent and ahead of anything yet discovered for hay and pasture. They blossom and the seed ripens together and are suited to the same soils. On low, moist lands, where other grasses would fail, they do especially well. They do well on any land where common grasses and clover grow.

One great advantage that is realized by a mixture of these grasses is the fact that they are both perennials and make a better combination than most any other two. When you once get them established they stay right with you until you wish to break up the sod. They do not winter kill. Sow 10 to 12 lbs. per acre. Postpaid, ½ lb., 45 cts.; lb., 75 cts.; 2½ lbs., \$1.75; 5 lbs., \$3.25. For Larger Quantities See Wholesale Green List Enclosed.

1585 Alta Fescue

An improved strain of tall fescue which was developed at the Oregon Agriculture Experiment Station. Produces high yields of palatable forage over a long growing season. For pasture sow 15 pounds per acre with other legumes such as Ladino Clover. Grows well on wet soil even when poorly drained, but also will endure drought. Because of its extensive root system it has the ability to prevent soil erosion in waterways and to form a dense turf on banks. It stands up under traffic and though coarse is excellent for athletic fields, airports, playgrounds and lawns where there is heavy traffic. Postpaid, ½ lb., 70 cts.; lb., \$1.30; 2½ lbs., \$3.10; 5 lbs., \$5.95. For larger quantities see Wholesale Green list enclosed.

Shumway's Big Yielding Hybrid and Open Pollinated Seed Corn—Well Graded—High Germination—Sold on Your Approval

1577 Shumway's Goliath Silo or Ensilage Seed Corn

The World's Greatest Yields—Many Report 50 to 75 Tons Per Acre.

For many years I have worked on this World's Famous Ensilage Corn, Selecting and Reselecting Pure Bred Seed and today I feel safe in saying it leads all others in growth of fodder-producing stalks 18 to 22 feet high. The leaves are broad and long, they start forming at the lower end of the stalk and continue to the very top. It has a strong root system thereby not affected by wind or drought. I produce this seed South of the Ohio River and do not recommend it to ripen as far North as Rockford. It is solely a silo filler and one acre will produce more tons of feed than 5 acres of ordinary corn.

Postpaid, lb., 55 cts.; 2½ lbs., \$1.20; 5 lbs., \$2.00. For Larger Quantities See Wholesale Green List Enclosed.

1556 Funk's G-114—Hybrid Yellow

(Tops the List for North Central Corn Belt)

Some people call it "intestinal fortitude." Others call it simply "guts." Anyway, in G-114, it's the ability to stand up against the beating that the North Central Corn Belt often hands out in weather and in insect attacks. Against cold spring dampness. . . . Against scorching summer drought. . . . Against blasting wind. . . . Against corn borers and other insect enemies, G-114 comes through. Even when harvest is long delayed, G-114 stands, firmly erect. In Iowa 4-year tests, its percentage of lodging was lowest (2.9%) of any strain entered. And it yields with the best. G-114 foliage stays green after the ear starts to mature, making the extra starch necessary to finish both a heavy ear and a strong stalk. Postpaid, 1 lb., 60 cts.; 2½ lbs., \$1.35; 5 lbs., \$2.50.

1575 Reid's Yellow Dent

120 Days—Southern Grown

The most popular sort of open-pollinated Yellow Dent Corn grown. It responds to good soil and cultivation with an immense yield of from 70 to 90 bushels per acre. Ears are large, 10 to 12 inches long with 18 to 22 rows of deep, golden yellow kernels, holding their size well to the end. Slightly rough, with grains dented on top. The plant is strong, sturdy 9-foot stalk and is covered with a good broad leaf making it excellent for ensilage. Especially suited for Central and Southern Corn Belt. Postpaid, lb., 55 cts.; 2½ lbs., \$1.20; 5 lbs., \$2.00. For Larger Quantities See Wholesale Green List Enclosed.

1561 Longfellow Yellow Flint

A yellow flint corn of rich and glossy appearance. The ears are 12 to 16 inches long, filled with large, broad kernels. It is not unusual to find three full-sized ears growing on one stalk and fields that yield 60 bushels per acre. It is a heavy producer of fodder as well as of ears. The average height is 7½ feet, while the ears are set about 3 feet from the ground. Matures in 85 days. Postpaid, lb., 55 cts.; 2½ lbs., \$1.20; 5 lbs., \$2.00. For Larger Quantities See Wholesale Green List Enclosed.

1568 Boone County White

Especially suited for Central and Southern Corn Belt. Postpaid, lb., 55 cts.; 2½ lbs., \$1.20; 5 lbs., \$2.00. For Larger Quantities See Wholesale Green List Enclosed.

RAPE

1640 Dwarf Essex

A Quick, Profitable Crop—Thrives Everywhere

In the spring when you are sowing small grains, sow it at the rate of 4 pounds per acre with your grain. This will furnish valuable pasture after harvest. Plant it by itself at the rate of 5 lbs. per acre and see the immense yield of forage it will produce. After the last cultivation of corn sow 3 lbs. per acre broadcast. This is undoubtedly the most profitable place to sow rape seed. If you are hogging the corn down, the hogs will clean the rape as well as the corn. If you husk your corn and pasture the cornstalks, all kinds of stock eat it readily, and this gives them green food with the dry. Postpaid, lb., 60 cts.; 2½ lbs., \$1.35; 5 lbs., \$2.50. For Larger Quantities See Wholesale Green List Enclosed.

1625 Golden Beauty Millet (50 lbs. Bu.)

For other grasses or forage plants have been able to produce the enormous yields of this plant. It has produced four to five tons of hay to the acre and from seventy to eighty bushels of seed. It may be sown on newly broken ground in the spring and as late as July. Leaves the ground in excellent condition for the following crop. Plant 30 pounds to the acre. Postpaid, lb., 55 cts.; 2½ lbs., \$1.20; 5 lbs., \$2.00. For Larger Quantities See Wholesale Green List Enclosed.

1627 Billion Dollar Grass (35 lbs. Bu.)

All things considered, we call this the most valuable thing in our whole list of forage plants. We recommend it for the following reasons: First, it makes more hay than German Millet or any other. Second, although it grows so large, sometimes seven or eight feet high, the hay is of the most excellent quality, superior to corn fodder. Third, it is adapted to all sections and a great success wherever tried. It does well on low ground. Fourth, two crops a season may be cut from it, or, if left to ripen, it will yield almost as many bushels of seed per acre as oats. Plant 20 to 25 pounds per acre. Postpaid, lb., 55 cts.; 2½ lbs., \$1.20; 5 lbs., \$2.00. For Larger Quantities See Wholesale Green List Enclosed.

1664 Henry Spring Wheat (Bearded)

We consider this the finest Spring Wheat in cultivation at the present time. The straw is stiff. The kernels are medium red in color, softer in texture and larger than any other Spring Wheat. Can be used as a feed wheat but it is also satisfactory for baking. Postpaid, lb., 50 cts.; 2½ lbs., \$1.10; 5 lbs., \$1.75. For Larger Quantities See Wholesale Green List Enclosed.

It is resistant to mildew, stem rust, and spot blotch. Outyields Wisconsin Barless and Oederbrucker. Postpaid, lb., 50 cts.; 2½ lbs., \$1.10; 5 lbs., \$1.75. For Larger Quantities See Wholesale Green List Enclosed.

1523 Japanese Buckwheat

Buckwheat can be easily grown wherever wheat will grow, producing a good yield on light or poor soils. Sow 36 pounds per acre in drills, 50 pounds broadcast. Postpaid, lb., 50 cts.; 2½ lbs., \$1.10; 5 lbs., \$1.75. For Larger Quantities See Wholesale Green List Enclosed.

1634 Certified Nemaha Oats

A New Variety of Oats that is 5 days earlier than Clinton; a reddish-seeded Oat about 2 inches shorter than Clinton but very stiff strawed. It is resistant to all the common races of leaf rust, also to stem rust and smut. It is a double cross of (Victoria-Richland) X (Morota X Bond). In the 1948 trials at Mt. Morris, Illinois, it outyielded all other varieties. Average yields per acre in this test was 78.6 bushels per acre.

1633 Certified Clinton 11 Oats

It is an improved strain of the original Clinton. It is resistant to disease, the same as the original Clinton was. Ripens very uniformly and also is uniform in plant height. This improved strain in official yield tests showed an increase of 30% in yield over the original variety.

"Gorgeous Petunias"

2356 Shumway's Large Flowering Giant Ruffled Double Supreme Mixture

These Giant Double Petunias are exceedingly showy. They have been produced from hand-pollinated seed and give almost 100% of double blooms. As the seeds are small and expensive, care should be taken in sowing. Start them in a box or pan filled with good fine loose soil. Press them into the surface rather than covering them with soil and place a pane of glass over the box to retain the moisture. The slow-growing plants with crumpled foliage are the ones that usually give the finest flowers. The blooms are large with gorgeous colorings. This is unquestionably the finest double-mixed Petunia in the world. Pkt., 95 cts.; 2 pkts. for \$1.75. Illustrated on Color Page 46.

Shumway's Glorious Zinnias

All Flower Seed Postpaid

The Most Popular Annual Flower

Zinnias are one of the most universally planted annuals. They are hardy and so easy to grow, doing well almost anywhere with little care. They offer many lovely colors, and their various types meet every garden need for beds, borders, and cut-flowers. Shumway's Zinnias are far superior to the old-fashioned Zinnias because they offer a wider range of delicate as well as rich colors, have much larger blooms, and are more handsome in shape. Zinnias flower profusely and continuously from midsummer to late autumn. For the finest double flowers, plant in a sunny location with good soil and plenty of water.

Giant Dahlia Flowered Type

The greatest improvement in Zinnias yet produced. The flowers are 5 in. or more across and 3 to 4 in. in depth, held on long strong stems. In form they resemble a giant Decorative Dahlia. The plants grow 3 to 4 ft. tall.
